

Every page has 3 different versions (desktop, tablet, mobile)

Index:

The screenshot shows a desktop browser window displaying a webpage titled "BENJAMIN'S WEBPAGE". The header includes a navigation bar with links: Welcome (highlighted in yellow), About, Gallery (highlighted in red), CV, and Contact. The main content area features a heading "WELCOME TO MY WEBPAGE!" followed by two paragraphs of text. To the right of the text is a small image of a white dog wearing a pink collar. Below the image is a caption: "If you have any questions, please contact me on the contact page". The browser's status bar at the bottom shows the title "My webpage 2025" and other standard browser information.

WELCOME TO MY WEBPAGE!

This webpage has been made for the web Technologies class at IMC Krems University in october 2025. since this is my first functional webpage, it has historical significance. I'm 100% sure it will be fun to explore again when I rediscover it someday in the far future.

Feel free to inspect the HTML and CSS code to see how I built and styled my webpage. For the most part, it was created using sources from the lecture slides (for example, the grid and flex templates). The webpage isn't professional, and the code is messy, but I hope you'll still enjoy it.

If you have any questions,
please contact me on the contact
page

The screenshot shows a dark-themed webpage. At the top is a header with a dark blue background. On the left side of the header is a vertical navigation menu with white text: "welcome", "About", "Gallery", "CV", and "Contact". To the right of the menu, the text "BENJAMIN'S WEBPAGE" is displayed in a white, bold font. Below the header is a large gray rectangular area containing text. The text starts with "WELCOME TO MY WEBPAGE!". It then describes the purpose of the webpage: "This webpage has been made for the Web Technologies class at IMC Krems University in October 2025. Since this is my first functional webpage, it has historical significance. I'm 100% sure it will be fun to explore again when I rediscover it someday in the far future." At the bottom of this gray area, there is a smaller note: "Feel free to inspect the HTML and css code to see how I built and styled my webpage. For the most part, it was created using sources from the lecture slides (for example, the grid and flex examples). The website isn't finished yet."

- <Main> element was created and for desktops it was given a „display: grid”, so it can show the dog picture next to the text.
- The dog picture was put inside an <aside> and a <figure> element.
- <Main> element changes margin as screen gets smaller and smaller.
- Similar to that, the navigation box, which was put inside the <header> and a <nav> changes too. The navigation shouldn't change size when switching between sites. It should be the same everywhere.
- There is a <footer> which has a fixed position on the bottom of the page. This should be present on all sites too.

About:

BENJAMIN'S WEBPAGE

About Me

My name is Benjamin. I am a student at IMC Krems University, where I study Informatics. I come from Hungary and often travel back and forth between Austria and Hungary by train. I actually created part of this webpage on the train itself. Not the most comfortable place to work, but I didn't want to waste time!

I used to play ice hockey for several years. I sometimes miss it, but it's difficult to keep up with the sport while studying at university. Since I stopped playing, I've been looking for other activities to do. One of my dreams is to climb mountains someday. I've never done it before, but I really want to try.

BENJAMIN'S WEBPAGE

About Me

My name is Benjamin. I am a student at IMC Krems University, where I study Informatics. I come from Hungary and often travel back and forth between Austria and Hungary by train. I actually created part of this webpage on the train itself. Not the most comfortable place to work, but I didn't want to waste time!

I used to play ice hockey for several years. I sometimes miss it, but it's difficult to keep up with the sport while studying at university. Since I stopped

- There is a `<section>` inside the `<main>` with „display: grid”, so the picture can be fit next to the paragraphs

- Similary the first page, the picture is wrapped inside a <figure> element and was given a <figcaption>.

Gallery:

- The pictures are inside a <div> box which is inside the <main> element. Grid has been applied for the <div> box. There are two columns for the pictures to fit in, and there is a total of 10 pictures.

CV:

The screenshot shows a dark-themed webpage titled "BENJAMIN'S WEBPAGE". The navigation bar at the top includes "Welcome", "About", "Gallery", "CV" (highlighted in yellow), and "Contact". The main content area features a dark gray sidebar on the left containing sections for "Education" (IMC KREMS UNIVERSITY, KREMS, AUSTRIA; FOX VALLEY LUTHERAN HIGH SCHOOL, APPLETON, USA), "Work history" (Ice Hockey Game Official (2025 - present)), and "Skills" (Python, HTML, CSS, Javascript, Linux). The main content area on the right contains sections for "Contact" (Email: 25IMCI0110@fh-krems.ac.at, Github: benjaminb34, Phone: +36 9 9999999) and "Languages" (Hungarian - native, English - proficient, German - beginner). The footer of the page says "My webpage 2025".

- A <section>, which is inside the <main>, contains the <article> and <aside>. The <article> is on the right side has the main information about me. <Aside> content on the left has additional information about me. A grid has been applied to the section, so the <article> and <aside> can be next to each other.

Contact:

The image displays two identical screenshots of a contact form titled "BENJAMIN'S WEBPAGE". The form is contained within a dark gray box. At the top left, it says "Contact me". Below that, there are four input fields: "Your first name:" with placeholder "Enter your first name here...", "your last name:" with placeholder "Enter your last name here...", "Reason for contact:" with three radio button options ("University", "Work", "Personal"), and "Message:" with placeholder "Enter your message here...". At the bottom of the form, there is a small text "My webpage 2025".

My webpage 2025

- Every <input> has been put inside a <form> element, and every input has its own label.
- The <textarea> shouldn't be resizable (the default option) and it should always fit inside the <main> element.
